NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended 31st December, 2013

1. APPLICATION OF NEW AND REVISED HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs")

The Group has applied the following new and revised HKFRSs issued by the Hong Kong Institute of Certified Public Accountants for the first time in the current year:

Amendments to HKFRSs	Annual Improvements to HKFRSs 2009 – 2011 Cycle
Amendments to HKFRS 7	Disclosures - Offsetting Financial Assets and Financial
	Liabilities
Amendments to HKFRS 10,	Consolidated Financial Statements, Joint Arrangements
HKFRS 11 and HKFRS 12	and Disclosure of Interests in Other Entities: Transition
	Guidance
HKFRS 10	Consolidated Financial Statements
HKFRS 11	Joint Arrangements
HKFRS 12	Disclosure of Interests in Other Entities
HKFRS 13	Fair Value Measurement
Amendments to HKAS 1	Presentation of Items of Other Comprehensive Income
HKAS 19 (as revised in 2011)	Employee Benefits
HKAS 27 (as revised in 2011)	Separate Financial Statements
HKAS 28 (as revised in 2011)	Investments in Associates and Joint Ventures
HK(IFRIC) – Int 20	Stripping Costs in the Production Phase of a Surface Mine

Except as described below, the application of the new and revised HKFRSs in the current year has had no material impact on the Group's financial performance and positions for the current and prior years and/or on the disclosures set out in these consolidated financial statements.

New and revised Standards on consolidation, joint arrangements, associates and disclosures

In the current year, the Group has applied for the first time the package of five standards on consolidation, joint arrangements, associates and disclosures comprising HKFRS 10 "Consolidated Financial Statements", HKFRS 11 "Joint Arrangements", HKFRS 12 "Disclosure of Interests in Other Entities", HKAS 27 (as revised in 2011) "Separate Financial Statements" and HKAS 28 (as revised in 2011) "Investments in Associates and Joint Ventures", together with the amendments to HKFRS 10, HKFRS 11 and HKFRS 12 regarding transitional guidance.

HKAS 27 (as revised in 2011) is not applicable to the Group as it deals only with separate financial statements.

The impact of the application of these standards is set out below.

HKFRS 10 "Consolidated Financial Statements"

HKFRS 10 replaces the parts of HKAS 27 "Consolidated and Separate Financial Statements" that deal with consolidated financial statements and HK(SIC) – Int 12 "Consolidation – Special Purpose Entities". HKFRS 10 changes the definition of control such that an investor has control over an investee when: (a) it has power over the investee; (b) it is exposed, or has rights, to variable returns from its involvement with the investee; and (c) has the ability to use its power to affect its returns. All three of these criteria must be met for an investor to have control over an investee. Previously, control was defined as the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Additional guidance has been included in HKFRS 10 to explain when an investor has control over an investee.

The directors of the Company (the "Directors") made an assessment as at the date of initial application of HKFRS 10 (i.e. 1st January, 2013) and concluded that the application of the standard has had no significant impact on the financial results or position of the Group for the current or prior period.

HKFRS 11 "Joint Arrangements"

HKFRS 11 replaces HKAS 31 "Interests in Joint Ventures", and the guidance contained in a related interpretation, HK(SIC) - Int 13 "Jointly Controlled Entities - Non-Monetary Contributions by Venturers", has been incorporated in HKAS 28 (as revised in 2011). HKFRS 11 deals with how a joint arrangement of which two or more parties have joint control should be classified and accounted for. Under HKFRS 11, there are only two types of joint arrangements - joint operations and joint ventures. The classification of joint arrangements under HKFRS 11 is determined based on the rights and obligations of parties to the joint arrangements by considering the structure, the legal form of the arrangements, the contractual terms agreed by the parties to the arrangement, and, when relevant, other facts and circumstances. A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement (i.e. joint operators) have rights to the assets, and obligations for the liabilities, relating to the arrangement. A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement (i.e. joint venturers) have rights to the net assets of the arrangement. Previously, HKAS 31 contemplated three types of joint arrangements - jointly controlled entities, jointly controlled operations and jointly controlled assets. The classification of joint arrangements under HKAS 31 was primarily determined based on the legal form of the arrangement (e.g. a joint arrangement that was established through a separate entity was classified as a jointly controlled entity).

Investments in joint ventures are accounted for using the equity method (proportionate consolidation is no longer allowed).

The Directors reviewed and assessed the classification of the Group's investment in a joint arrangement in accordance with the requirements of HKFRS 11. The Directors concluded that the Group's interest in a jointly controlled entity, which was classified under HKAS 31 and was accounted for using equity method, should be classified as a joint venture under HKFRS 11 and continues to be accounted for using the equity method.

Amendments to HKAS 1 "Presentation of Items of Other Comprehensive Income"

The Group has applied the amendments to HKAS 1 "Presentation of Items of Other Comprehensive Income". Upon the adoption of the amendments to HKAS 1, the Group's "statement of comprehensive income" is renamed as the "statement of profit or loss and other comprehensive income". The amendments to HKAS 1 retain the option to present profit or loss and other comprehensive income in either a single statement or in two separate but consecutive statements. Furthermore, the amendments to HKAS 1 require additional disclosures to be made in the other comprehensive income section such that items of other comprehensive income are grouped into two categories: (a) items that will not be reclassified subsequently to profit or loss and (b) items that may be reclassified subsequently to profit or loss when specific conditions are met. Income tax on items of other comprehensive income is required to be allocated on the same basis – the amendments do not change the option to present items of other comprehensive income either before tax or net of tax. The amendments have been applied retrospectively, and hence the presentation of items of other comprehensive income has been modified to reflect the changes. Other than the above mentioned presentation changes, the application of the amendments to HKAS 1 does not result in any impact on profit or loss, other comprehensive income and total comprehensive income.

2. SEGMENT INFORMATION

Information reported to the executive directors, being the chief operating decision maker, for the purposes of resource allocation and assessment of performance is focused on geographical markets, based on the location of customers. BUSINESS REVIEW

Profitability analysis

The Group's consolidated revenue remained fairly stable in 2013 and decreased by less than 1% to HK\$1,463.0 million (2012: HK\$1,475.5 million). Both profit attributable to owners of the Company and basic earnings per share decreased by 2% to HK\$47.7 million and 12.4 HK cents respectively in the year under review (2012: HK\$48.9 million and 12.7 HK cents).

Higher labour costs and continued appreciation of Renminbi continued to put pressure on the gross margin of the Group. The statutory minimum wages in Shenzhen City, Zhongshan City and Heyuan City, where the Group's manufacturing facilities were located, were raised by 6.7%, 19.1% and 18.8% respectively in 2013. The Renminbi also appreciated by almost 3% against both United States ("US") dollar and Hong Kong dollar throughout 2013. Despite this, the Group managed to keep its gross profit ratio (being the ratio of gross profit to revenue) stable at 18.5% in 2013 (2012: 18.5%) through improvement in operational efficiency, modest price adjustments and increase in sales of higher margin house brand and licensed brand products. Because of the increase in depreciation charge after the production plants in Heyuan City started operations in late 2012, total expenses-to-revenue ratio (being the ratio of the total of distribution and selling expenses, administrative expenses, other expenses and finance costs to revenue) increased by 0.9% from 16.5% to 17.4%. The Group recorded a net after-tax gain of HK\$19.3 million on disposal of two wholly-owned subsidiaries holding two pieces of unutilised land in Heyuan City during the year. Accordingly, the net profit ratio (being the ratio of profit attributable to owners of the Company to revenue) remained flat at 3.3% in both 2013 and 2012. The net profit ratio of 2013 would have decreased to 1.9% if this gain was excluded.

Original design manufacturing (ODM) division

Revenue generated by the ODM division contributed 90% to the consolidated revenue of the Group in both 2013 and 2012. Market sentiment in the two principal markets of the ODM division, namely Europe and the US remained soft in 2013. Sales to ODM customers decreased by 2% from HK\$1,331.1 million in 2012 to HK\$1,311.0 million in 2013. The geographical sales mix of the Group remained fairly stable in 2013. Sales to Europe, the US, Asia and other regions accounted for 66%, 28%, 5% and 1% respectively of the revenue of the ODM division in 2013 (2012: 67%, 27%, 4% and 2% respectively). The Group continued to maintain a balanced sales mix between prescription frames and sunglasses. Sales of prescription frames, sunglasses and spare parts accounted for 50%, 47% and 3% respectively of the revenue of this division in 2013 (2012: 48%, 50% and 2% respectively).

Distribution and retailing divisions

Revenue generated by sale of house brand and licensed brand products through the designated distributors of the distribution division accounted for 10% of the consolidated revenue of the Group in both 2013 and 2012. Revenue of the distribution division increased modestly by 6% from HK\$140.1 million in 2012 to HK\$148.5 million in 2013. Decline in sales to the European markets was offset by the increase in sales to the emerging markets in Asia and South America. Sales to Europe, Asia, North America and other regions accounted for 48%, 28%, 7% and 17% respectively of the revenue of the distribution division in 2013 (2012: 54%, 24%, 8% and 14% respectively).

The retailing division continued to contribute less than 1% to the consolidated revenue of the Group. Revenue of this division decreased from HK\$4.3 million in 2012 to HK\$3.5 million in 2013 as the Group only operated one shop in Shenzhen City in 2013 after the closure of two shops in 2012.

Financial position and liquidity

Cash Flows

The cash inflow generated by the Group's operating activities decreased from HK\$153.9 million in 2012 to HK\$113.4 million in 2013 as a result of decline in profitability and increase in working capital during the year under review. On the other hand, capital expenditure decreased significantly from HK\$206.5 million in 2012 to HK\$66.2 million in 2013 as the Group completed the acquisition of an office premise in Hong Kong with a total cost of HK\$99.0 million in 2012. Total amount of dividend payments was also reduced from HK\$40.9 million in 2012 to HK\$20.2 million in 2013 because of the decline in profitability of the Group. Accordingly the net cash position of the Group (being the total of short-term bank deposits as well as bank balances and cash less bank borrowings) increased from HK\$126.6 million as at 31st December, 2012 to HK\$169.5 million as at 31st December, 2013.

Working capital management

As production activity is normally at the peak level before Chinese New Year and the Chinese New Year of 2014 was closer to the financial year end date of 2013, inventory balances increased by 6% from HK\$196.5 million as at 31st December, 2012 to HK\$208.1 million as at 31st December, 2013. Inventory turnover period (being the ratio of inventory balances to cost of sales) increased from 60 days in 2012 to 64 days in 2013. Total amount of debtors and bills receivable balances increased slightly by 2% from HK\$406.3 million as at 31st December, 2012 to HK\$413.3 million as at 31st December, 2013 and the debtors turnover period (being the ratio of the total of trade debtors and bills receivable to revenue) also increased from 101 days in 2012 to 103 days in 2013. Despite this, the Group's financial position remained strong and liquid. The current ratio (being the ratio of total current assets to total current liabilities) of the Group increased from 2.2 to 1.0 as at 31st December, 2012 to 2.5 to 1.0 as at 31st December, 2013 as a result of the increase in net cash position of the Group.

Gearing position

The gearing position of the Group remained low throughout 2013. The debt to equity ratio (expressed as a percentage of non-current liabilities over equity attributable to owners of the Company) remained stable at less than 1% as at both 31st December, 2013 and 31st December, 2012. The non-current liabilities of the Group comprised only deferred taxation which amounted to HK\$10.1 million as at 31st December, 2013 (31st December, 2012: HK\$8.4 million).

Net asset value

The Group had 383,650,000 shares in issue as at both 31st December, 2013 and 31st December, 2012 with an equity attributable to owners of the Company amounting to HK\$1,316.4 million and HK\$1,273.3 million as at 31st December, 2013 and 31st December, 2012 respectively. Net asset value per share (being the equity attributable to owners of the Company divided by the total number of shares in issue) as at 31st December, 2013 was HK\$3.43 (31st December, 2012: HK\$3.32).

Foreign currency exposure

The Group was exposed to the continuous appreciation of Renminbi against both US dollar and Hong Kong dollar. Save as above, the Group had limited exposure to foreign exchange rate fluctuations as most of its transactions were conducted in either US dollar, Hong Kong dollar or Renminbi and exchange rate movements between US dollar and Hong Kong dollar were relatively stable during the year under review.

PROSPECTS

The global economic environment remains volatile with low business visibility. Concerns over the effects of withdrawal of quantitative easing policy by the US Federal Reserve, the extreme weather conditions in Northern Hemisphere in the past few months and the recent geo-political tensions in Europe affect the procurement confidence of customers. On the other hand, customers are placing more emphasis on the reliability of the supply chain and are consolidating the vendor portfolio into a smaller number of larger key vendors. The Group benefits from this trend and its core ODM division currently maintains a stable order book of around three months' sales order on hand.

On the costs side, there are no signs of abatement in the upward trend of labour costs in China. The statutory minimum wage of Shenzhen City has been raised by 13% since February, 2014 and it is anticipated that other cities where the Group's manufacturing facilities are located will also raise their respective statutory minimum wages in the near future. Although the pace of appreciation of Renminbi is slowing down in the first quarter of 2014, the market consensus is that the currency will gradually appreciate in the long term. The Group continues to tackle these challenges by enhancing the flexibility in our production scale, streamlining our operations and modest price adjustments.

Revenue contributed by the distribution division has increased by 41% and 393% over the past five years and ten years respectively. The Group will continue to leverage on its extensive global distributor network developed over the past ten years, further invest in acquiring or developing new brands and expand the distributor network.

The factory relocation plan from Long Gang Area, Shenzhen City to Pingdi Town, Shenzhen City and Heyuan City are being executed in phases. The Group has submitted its redevelopment plan of the piece of land occupied by its existing factory in Long Gang Area with a site area of approximately 60,000 square metres to the relevant bureau of the Shenzhen municipal government for its approval and is evaluating various options of realizing the full potential value of this piece of land.

The Group remains alert to further difficulties and challenges that may arise in the global operating environment and will address the various challenges in coming years with financial discipline. The Group is steadfast in its strategy to invest in the future and position itself to seize opportunities that emerge in these challenging times.

EMPLOYEES AND REMUNERATION POLICIES

As at 31st December, 2013, the Group employed approximately 9,800 (31st December, 2012: 10,200) full time staff in mainland China, Hong Kong and Europe. The Group remunerates its employees based on their performance, experience, qualifications and prevailing market salaries while performance bonuses are granted on a discretionary basis after considering individual performance and the operating results of the Group. Other employee benefits include insurance and medical coverage, subsidised educational and training programmes as well as provident fund schemes.
